Sage Point of Sale

All rates are updated from the back-office accounting system (Sage50, Sage200/MMS or Sage Accpac).

After updating the VAT Rate on the Accounts side, export your Accounts data to the till system. Then go to Launchpad – Store Procedures – Update Tills.

If you need to process a refund through the till after 1st January 2010 for a sale made at the 15% rate it would have to be processed through the back office. If you have a problem please call us.

- Document layouts or custom reports normally use the rate automatically. However, all should be checked if you might have a 'fixed' VAT rate typed on to the layout or report.
