- Export documents to PDF
- MS Office® support
- All files are safe & secure within the database.
- No need to keep track of disparate document folders on your PCs & servers
- Multiple files and file types stored against each transaction
- Easy navigation
- Backup source documents
- Paperless office!

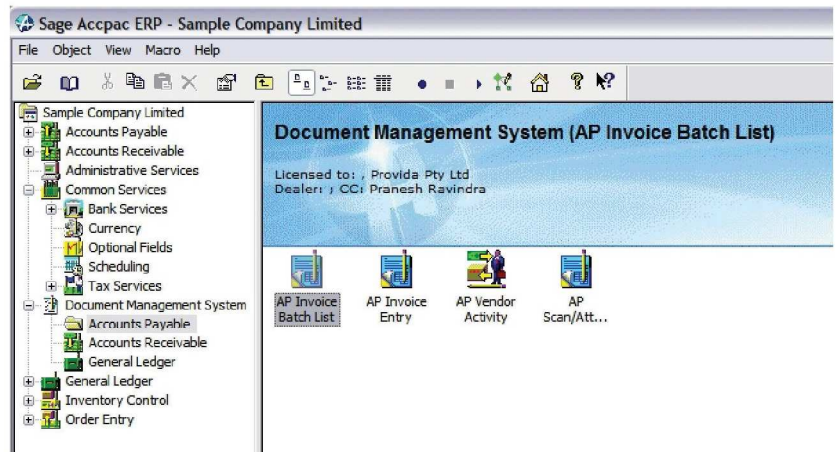

Integrated with Accpac ERP security

AP Invoice Screen with Integrated DMS functionality

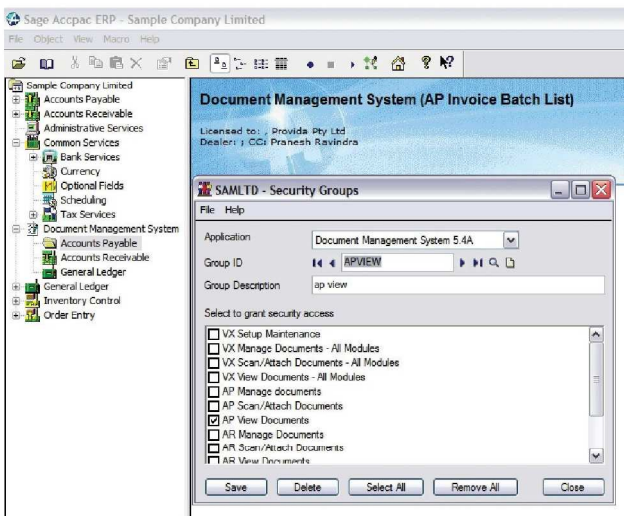

Sage Accpac Document Management System™ is an essential Sage Accpac ERP add-on module that electronically scans and stores documents associated with ERP transactions. The DMS brings the notion of a “paperless office” one step closer. Full drill down to source electronic documents is only a click away!

Sage Accpac DMS is written in Accpac Software Development kit (SDK) and therefore is tightly integrated with Sage Accpac ERP.

Sage Accpac DMS uses Accpac security and user licences. Future releases will include optical character recognition (OCR) and document workflow.

Document Management System

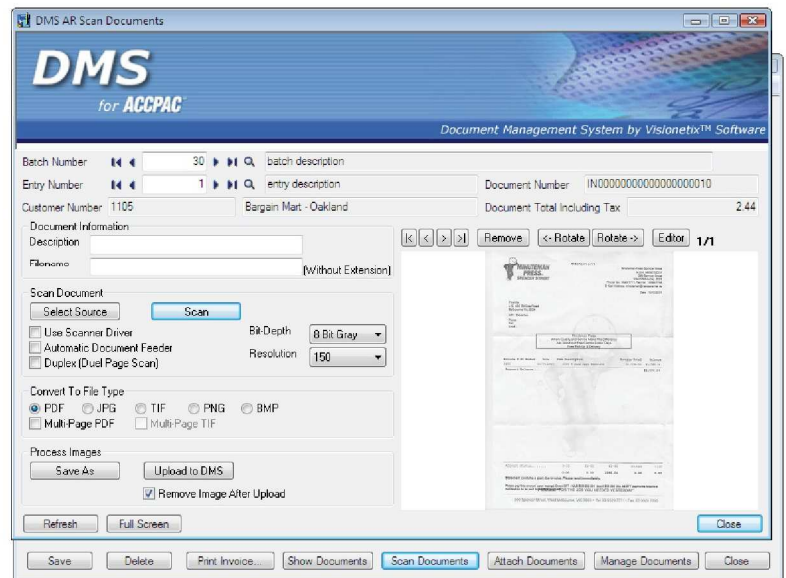

FUNCTIONAL FEATURES:

- Integrated DMS system within the standard ACCPAC interface
- Store binary image data from ACCPAC directly to the DMS database
- Scans multi-page documents
- Scans in duplex
- Supports automatic document feeders
- Relate digital documents to ACCPAC database transactions
- Retrieve digital documents as they relate to ACCPAC transactions
- Manage DMS Documents directly from ACCPAC
- Scan documents to digital format directly from the scanner
- Export saved documents to a number of format including Word and PDF
- Fully integrated with ACCPAC Security

TECHNICAL FEATURES:

- Developed using the Sage Accpac software development kit and ASP.Net.
- Supports all Twain based scanners
- Supports Sage Accpac ERP 5.4 or higher
- Exports scanned images to PDF
- Stores documents in a SQL database in binary format
- Electronic documents can be backed up on a SAN
- Client server model i.e. documents are scanned on the client but stored on the server via an ASP.Net website.

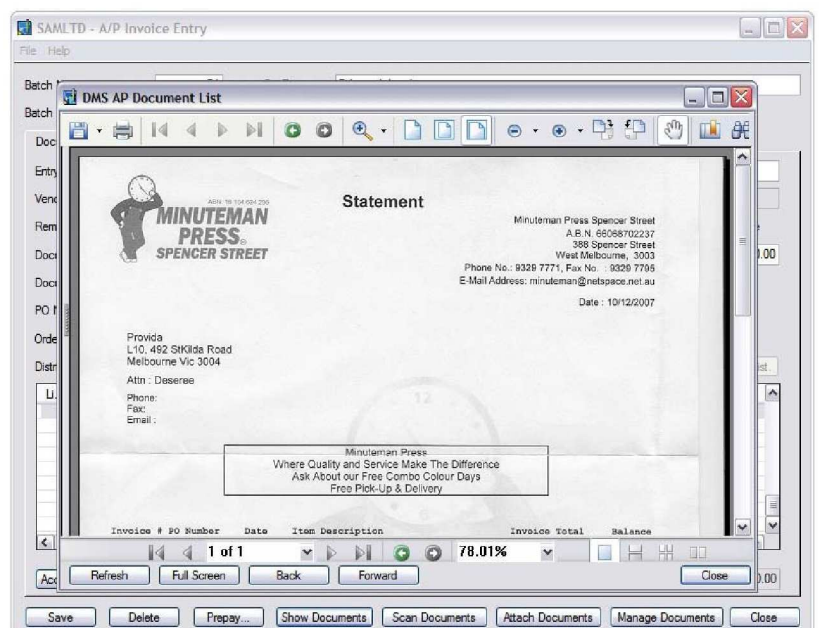

Scan documents directly from Accpac ERP

Lois Rubin, Finance Manager at Wavelink Communications said

"We are currently using the Visionetix Document Management System – feedback is that staff are "loving it". Processing appears simple and effective, and Paper flows are already reducing in our office"
